

THE AUTHOR

US defense expert Jay Tuck was executive news director of the daily network program *Tagesthemen* on ARD Television. In his 35 years at the German Network, he produced over 500 television segments. He also served twice as combat correspondent in Iraq. His investigative reports on security policy, espionage activities and weapons technology appear in leading publications in Europe, including *Focus*, *Le Point*, *Stern*, *Welt* and *ZEITmagazin*. He is author of the widely acclaimed book on electronic intelligence activities, "High-Tech Espionage" (St. Martin's Press, New York), published internationally in fourteen countries. His current book, "Evolution without us – Will AI kill us?" (Plassen Publishing) was researched at US and European drone bases, defense and intelligence agencies, as well as AI research institutions.

Jay Tuck is an acclaimed international speaker whose lively talks are accompanied by exclusive video and photographs. His TED-Talk reached over 250.000 Views in Internet. The German news channel *Tagesschau24* aired a half-hour interview with him. Tuck speaks to private banks and financial institutions (World Bank, Chambers of Commerce), gala events (Deloitte, ServicePlan), Media and Medical Congresses (WAZ, Universitätsklinikum Essen), Innovation und Research Symposia (Goethe University, Frankfurt), as well as security and law enforcement conferences (Sicherheitsgespräche 2017, Berlin).
